barech@hollandhart.com

Bryan is a patent attorney who focuses his practice on strategic patent prosecution.

He works with his clients to develop a lasting approach for seizing value from their IP. Bryan works with clients ranging from start-up firms to recognized companies in the electronics, mechanical, and software arts.

Previously, Bryan was a research and development engineer at the Anschutz Medical Campus and helped to cultivate multiple medical device start-ups. During these endeavors, Bryan worked closely with physicians, engineers, scientists, and patients in developing minimally invasive treatments for cardiac and ocular diseases. As a result of these efforts Bryan has co-published scientific articles and co-invented patented technologies for medical imaging, surgical devices, and adaptable polymer materials.

Prior to joining Holland & Hart, Bryan worked as a Patent Attorney at Marsh Fischmann and Breyfogle.
