Clients turn to Kevin for his ability to identify creative solutions for complex remediation of hazardous substances and water contamination, as well as the associated repurposing of the land.

Kevin is known for his innovative and unique resolutions to complex contamination issues, especially involving multi-jurisdictional and multi-agency matters (particularly EPA and NRC) in the mining, real estate, energy, petroleum, nuclear, and manufacturing industries. His practice focuses on managing environmental liabilities, repurposing real estate assets, and creating value through property remediation and planning. Kevin is respected for his strategic approach to crafting cutting-edge legal solutions that deliver maximum value for his clients, clients ranging from the largest international corporations to individual landowners. He has been the lead attorney for billions of dollars of acquisition and development of environmentally-challenged assets worldwide, including many Superfund sites. Kevin has significant experience with CERCLA, RCRA, state hazardous waste laws, and related programs, and substantial experience with uranium mine and mill remediation and decommissioning. His practice expertise also includes the Clean Water Act, where he counsels clients on compliance and water quality matters.

Texas

EXPERIENCE

Negotiates federal Consent Decrees, Administrative Orders on Consent, and related agreements for matters related to:

- CERCLA
- RCRA
- Brownfields development
- Clean Water Act (CWA)

CLIENT RESULTS

Successful remediation of legacy mine and mill assets associated with historic uranium operations.

Strategist behind the highly innovative and successful Midvale Slag Site, which recently was deleted from the U.S. Environmental Protection Agency's National Priorities List of Superfund Sites 50 years ahead of schedule.

Played a key role in the Richardson Flats remediation, which was recognized by the Department of the Interior as the site of the year for its

effective combination of Natural Resource Damages Restoration and CERCLA remediation.

Led the remediation and redevelopment of a 450-acre smelter site through the innovative use of special account and private funds. It was the first time EPA had agreed to use the approach. The former smelter site is now a thriving multi-use project.

Led the development of innovative protocols for the reclamation and redevelopment of 2000-plus acres of mining land in a leading resort area. Continued development of estate lots, residential, commercial and hotels.

Lead counsel on one of the first projects to successfully utilize the EPA ER3 pilot Superfund initiative.

Negotiated a Prospective Lessee Agreement, a liability relief mechanism reportedly used by EPA only one other time in CERCLA history.

Led the environmental team of a utility cooperative in permitting a large wind farm.

Counsel to potentially responsible parties in the remediation of seven miles of petroleum contaminated canal sediments.

Counsel to numerous parties in the negotiation of dozens of consent decrees for NPL site remediation.

Due diligence counsel in a \$3.2 billion acquisition of a Fortune 50 company.

Due diligence counsel in a bid to acquire a 1500 mile portion of a gas pipeline system, as well as an 8000 mile gulf natural gas pipeline and its associated 68.5 billion cubic feet storage system.

Due diligence counsel to acquire the production, gathering, transmission, and distribution assets of a large gas company, including more than 12,000 miles of pipeline and 90 compressor stations.
